

ONBOARD CREW MANAGEMENT

JOB TITLE/RANK	Electrical Engineer/Electrical Officer
DEPARTMENT	Engine/Deck (As applicable to Vessel type)
RESPONSIBLE TO	Chief Engineer

It is recognized that certain nationalities of crews are accustomed to different duties compared to other nationalities (For example officers responsible for the maintenance of safety and lifesaving equipment). Accordingly, the Master has the authority to change the tasks as he sees fit in agreement with the Ship Management Office.

In addition, the Master has the authority to allocate any reasonable task or duties that may be required for the safe and efficient operation of the ship.

MAIN PURPOSE OF THE JOB:

The maintenance of the vessel's electrical and electronic equipment. Providing assistance to the Chief Officer for specific electrical cargo equipment.

KEY TASKS AND RESPONSIBILITIES:

The Electrical Engineer is responsible to the Chief Engineer for:

- Maintaining the vessel's electrical and electronic equipment
- Adopting safe working practices
- UMS test schedules, alarm test etc
- Assisting during maintenance as required over and above electrical equipment maintenance
- First level maintenance of communications, radio and navigation equipment
- Providing support for safe and efficient running of electrical equipment during cargo operations

PERSONAL BEHAVIOURS & QUALITIES.

The job requires:

- Good team working skills
- Ability to perform all tasks in an orderly way
- Comfortable understanding and following instructions and willing to ask for clarification if necessary
